

SOCIAL MEDIA @ YOUR EVENT

LIVE TWITTERSTREAM

Connect with attendants, clients and prospects, involve those who are not able to attend and create buzz around your event with your own live TwitterStream.

LIVE DURING YOUR EVENT

Before, during and after an event visitors will use social media like Twitter. Facilitate the online discussion by offering a live Twitter stream. Listen, learn, create buzz and join the conversation. Visitors are able to follow the stream in your venue, at your stand, on their PC's at home or on the road on their mobile devices.

LOW COST, NO EFFORT

Our TwitterStream mini sites offer high visibility at low costs. There's is no effort required from your side to get your TwitterStream mini site online; we take care of business, you provide feedback. All you need is an internet connection.

INTERACT, SHARE, CONNECT, BUZZ

HOW DOES IT WORK?

A branded TwitterStream mini site collects and displays tweets with your own conference hashtag (#), other hashtags, tweets with certain keywords and your own tweets. The mini site may include a tweetbox, social widgets for 40+ social networks, your RSS newsfeed, photos, videos and links to your event website.

ABOUT US

We have implemented 750+ streams including streams for recruitment, marketing, sports and political events but also business events like The Women's Conference Europe.

GET YOUR OWN STREAM NOW!

Do you organize or participate at an event? Want to impress visitors, clients and prospects? Want to involve and interact with visitors and attendants? Get in contact with us NOW at info@TweetStreams.org. We will have your own TwitterStreams site online in just a few days!

Whether you organize an event for your clients and prospects or if you and your company participate at an online conference or exhibition; a TwitterStreams mini site is a modern, great and effective eye-catching new way of client engagement.

A TwitterStream is great at live events but with your stream you also reach people who are not able to physically attend the event.

Clients and prospects follow your event and your tweets through their PC's and mobile devices like telephones and tablets. You even reach people who do not use Twitter as Twitter is not required to follow your tweets!

PROFESSIONAL BRANDING

We not only gather and show your tweets; your live stream is also fully branded. It seamlessly integrates with your event— or company website and your other marketing channels. Project your live stream during the event on PC screens, large screens or a video wall.

Best of all, there's no effort and costs involved to get your live TwitterStream up and running!
